10/22/12	
11/05/12	12/03/12
11/19/12	12/17/12

Snow Removal

The Public works Department would like to share some helpful hints that might make the removal of snow less frustrating to all. If possible do not park vehicles in street 1 hour after snow fall until 12hr after snow has stopped

If you have a driveway use it. If a car is in the street the plow has to leave a area that is not cleared to curb line approximately (3) times the car length. Please do not throw snow into street with shovels or snow blowers instead throw it back onto lawn areas. If possible wait

until borough trucks have stopped before you clear your driveway. The borough workers work hard to make driving safer and easier in snowy conditions. We thank you for your cooperation and look forward to providing this essential public service.
